

# YOUR WORKPLACE HAS GREMLINS.

**We can find them.**

**eTRAX™**

Inspection Tracking

**Safe and Sound™**

# Take the Guesswork Out of Safety Compliance.

eTRAX™ Inspection Tracking is not an off-the-shelf, scanner-based software package. eTRAX is fully customized to your workplace and your processes. Each report is built the way you want it, delivering the information you deem important to maintain safety, assure compliance, and scare off any gremlins. And, as an extra precaution, we audit your reports for completeness and validity before emailing them to you.

So with the eTRAX technology, your folks can put their clipboards and pencils away, and spend their time doing what's most important – making sure assets are inspected, in good working order, and free of any gremlins. We take care of the reporting...just to make sure everything is safe **and** sound.

## Here's How eTRAX Keeps You Safe And Sound:

- Turnkey Solution
- Fully Configured to Your Specs
- Custom Reports
- Third-Party Auditing Services
- Cloud Solution
- 24/7 Data Access
- Commercial Grade Collection Devices
- Training & Tech Support
